

Akhil Bandari

MobileNo- 7207356336

Akhilbandarirpa5566@gmail.com

- A versatile Robotics Process Automation developer with Around 3 years of professional experience in Software Industry.
- Handling, debugging, troubleshooting in Web and Windows Adaptor using **RPA tools(Ui Path)**.
- Having Knowledge on Pega Robotics OpenSpan RPA tool and done POC's in MS Visual Studio 2015 by integrating Pega Plug-in.
- Hands on experience in Windows Adapter, Web Adapter Browser based platform application integration and having good knowledge on Connectors in MS Excel, Word & Outlook.
- Analyze client's business requirements and processes through IT-Feasibility, Robotic Factor calculation, process flows, and workshops.
- Ability to work as a team member or as an individual and confident in serving the best results.
- Having End to End Experience starting from Requirement gathering, Feasibility Testing, Getting approval from users, Development of robot, UAT Testing, Deployment of the Robot in Production Environment and maintains of robot after deployment.
- Analyzed, Designed and Developed Robots in Business Process Automation using UiPath.
- Used Technologies such as java, JavaScript, MsSql, PDF data handling, Email Automation, and Process Flow Charting.

Technical Expertise:

- **Operating Systems** : Windows 98, 2000, XP, Vista, Linux, Windows 7/8/8.1/10
- **Programming Language** : C#, VBA Script(Macros), VB.Net
- **Database** :Microsoft SQL server 2012, 2017
- **Tools** :Ui Path Studio, Orchestrator.
- **Migration Tools** : Github, Source Tree.

Certifications:

- Certification in UiPath Advanced Level RPA Developer and Orchestrator

Professional Experience:

- Worked as a **Software Engineer** at **Accenture**, Bangalore from May 2018 to Till Date.

Projects Involved:

Project Name	Credit and Tax invoice Ticket Process
Environment	Ui Path Studio, VB.Net, MS SQL Server, Excel Macros

Description:

- Study about the user manual process and understand the flow as per client requirement. Grap the flow of process and design the As Is and To Diagram.
- Digital Signature, Excel process, Sending mail are palys main role. Read data from excel based on color combination. Fetch invoice data replace in another excel sheet, convert excel to pdf for the wholeprocess.
- Apply 2 different digital signature in the pdf.
- Send email to the respective client were the airplane ticket is processed or cancellation.

Role & Responsibilities:

- By using Ui Path Studio Designed and developed a solution to replace manual process of entering from different legacy source systems which include Web application.
- Solution designing as Architect level and connecting with Stake Holder for requirement gathering.
- Co-Ordinating with Process Team to understanding the requirement for development.
- Designing process flow, Development, testing & Production Support for Deployment.
- Handle the development and make sure for the right productivity and accuracy of results.
- Working independently and capable of attending calls and meetings.

Client	HSBC Financial Services
Project	AP Forecast vs Actual
Role	RPA Developer
Duration	June - 2019 to Dec -2019
Environment	UiPath Studio, C#, MS SQL Server, MS Excel Macros
Description: <p>To track the CFF Vs Disbursement variance for specific week and specific month. To project the correct, thresh hold values for Monthly forecast. Top vendors with reason for Variances Invoice reception delay, Blocked invoice approval delay, Payment hold, Less than 30 day's pay term CDF Block.</p>	
Role & Responsibilities: <ul style="list-style-type: none">• By using MS Visual Studio Designed and developed a solution to replace manual process of entering from different legacy source systems which include Windows application.• Solution designing as Architect level and connecting with Stake Holder for requirement gathering.• Developing Excel Macros for the Variance check and validation by using VBA Script.• Handle the development and make sure for the right productivity and accuracy of results.	

Client	HSBC Financial Services
Project	Customer Management Function ERP Update
Role	RPA Developer
Duration	Nov- 2020 to May - 2020
Environment	Ui Path Studio, VB.Net, MS SQL Server, Excel Macros
Description: This automation reads the shared mailbox inbox folder based on the configuration file rules and downloads the template. Once it is done it reads the template and start performing the Baan activities (<i>**activities based on the business rule</i>), saves the screenshots for successful transactions, updates the comments for each status, moves the files to repository location to shared drive and replies to sender with both screenshots attached word file and comments updated template	
Role & Responsibilities: <ul style="list-style-type: none"> • By using MS Visual Studio Designed and developed a solution to replace manual process of entering from different legacy source systems which include Windows application. • Solution designing as Architect level and connecting with Stake Holder for requirement gathering. • Co-Ordinating with Process Team to understanding the requirement for development. • Designing process flow, Development, testing & Production Support for Deployment. • Handle the development and make sure for the right productivity and accuracy of results. • Working independently and capable of attending calls and meetings. 	

Project Name- Siemens - Topas	
Client	Germany
Role	RPA Developer
Platform	UiPath Studio
Team Size	11
Description	1. Monitoring the Batch files on Daily/Monthly basis. 2. Executing the Queries and fetch the data 3. Excel Macro to Maintain report by applying filter on extract files. 4. Maintaining the Batch files with Excel and Screenshots 5. Sending mail using the SMTP mail activity in UIPATH and also sending attachment

Responsibilities Taken –	<ul style="list-style-type: none"> ➤ Understanding and analyzing the business and resource requirements. ➤ Estimation/Design Components. ➤ Development of functionality specific reusable components. ➤ Unit testing carried out in order to check whether the project was working as Desired.
